Preface

University Dental College, a project of Dental & Medical Community Services and Research Foundation, is a prestigious institution for dental education and health services in Bangladesh. Since commencement in 1995, the institution has been managed and run by highly qualified and skilled faculty members who take imparting of knowledge and skills more as a mission than a profession. The high standard of teaching has already attracted many students to this institution and the management takes special care to ensure that the highest quality is maintained at any cost. The authority always strives to upgrade the teaching methods employed. The year round presence of visiting and honorary faculty members amply exemplify the efforts. The courses offered by the College are compatible with those offered by international institutions.

The day to day affairs of the institution is closely monitored by the Director and Governing Body members. The authorities keep themselves informed of the needs of the students and take immediate measures to attend to any requirements.

University Dental College promises high education standards in a friendly and welcoming environment. The institution molds the students to not only become efficient dental professionals, but to also be quality human beings.

Minister

Ministry of Health and Family Welfare
People's Republic of Bangladesh

I am delighted to know that, University Dental College & Hospital is going to celebrate its Silver Jubilee Program and organizing UDC Dental Summit 2021, on 2nd October, 2021 at Radisson Blu Water Garden, Dhaka.

The University Dental College has emerged as a premier dental college imparting dental education to its students & graduates and extending oral health services to countless patients. I am happy to know that, more than 1000 students have already been graduated from this institution. I appreciate the doctors of University Dental College & Hospital, have fought in this pandemic situation as front liner.

Over the last few years, Bangladesh has made remarkable progress in the health sector specially Dentistry under the present Government lead by our Honorable Prime Minister Sheikh Hasina. These achievements are the result of her wise planning, careful implementation and good monitoring.

I am sure this celebration will be a joyous occasion, and the participants will be benefited through this summit by exchanging their knowledge, views, expertise and technology with international and local faculties of Bangladesh.

Finally, I extend my warm greetings and felicitations to all those associated with this grand event and wish the success of the Silver Jubilee celebration and UDC Dental summit 2021.

Joy Bangla, Joy Bangabandhu
Long live Bangladesh.

Zahid Maleque MP

MESSAGE

Professor Dr. Md. Akhtaruzzaman
Vice-Chancellor
University of Dhaka

Greetings of the 'Mujib Shoto Borsho' and congratulations on the Centenary Celebrations of the University of Dhaka.

I am pleased to know that the University Dental College (UDC) established in 1995, is going to celebrate its Silver Jubilee this year on 2nd October 2021, at Radisson Blu Water Garden, Dhaka.

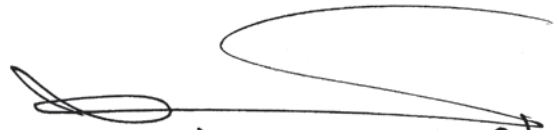

The University Dental College has become one of the leading dental college with its name and fame by giving invaluable services towards communities. I am delighted to know that more than 1000 students have already graduated from this renowned institution and serving the nation's oral health care needs. I highly appreciate the special services during the pandemic Covid-19, the doctors of University Dental College is rendered as front line workers.

It is also gratifying to know that the college has introduced the first Simulation Dental Laboratory in Bangladesh for pre-clinical education for undergraduate students to improve their clinical skills at the highest level. It is also good to mark that on the occasion of the Silver Jubilee of the College, the organizers are holding a conference called UDC Dental Summit. I hope the Dental Summit 2021 will be a unique opportunity to exchange views, ideas and experiences among the participants to enrich their professional skills and experiences. I also expect that this institution will continue to keep up their contributions in the field of dental education and health care services in Bangladesh.

I wish the Silver Jubilee Program of the UDC a great success.

Joy Bangla. Joy Bangabandhu.

Long live University of Dhaka. Long live Bangladesh.

(Professor Dr. Md. Akhtaruzzaman)
Vice-Chancellor 10/10/2021

MESSAGE

Dr. Md. Wahiduzzaman
Chairman,
Governing Body
University Dental College

My warmest regards and all the best wishes to you on the commemoration of Mujib Shoto Borsho, the 50th anniversary of our Independence, and the celebration of 25 years of University Dental College.

2021 is a momentous year for UDC as we celebrate the 25th Anniversary of our journey to nurture the next generation of dentists. This was due in 2020, however we refrained from celebrating due to the pandemic.

UDC has been celebrating a milestone of significant achievements. We are proud to introduce Simulation Dental Laboratory for pre clinical education. It has simultaneously been making history, marking it as an institution that illuminates excellence in the education of dentistry.

The past quarter of a century has witnessed thousands of skilled dental surgeons graduating from UDC, who were not only Bangladeshi but from various corners of the globe. We are honored that they are successfully offering their services all over the country as well as abroad with great pride.

Since its commencement in 1995, the institution has been managed and run by highly qualified and accomplished faculty members who take imparting knowledge and skills more as a mission than a profession. I would like to acknowledge the contribution of all the past and present faculty members of this institution whose dedication and tireless efforts brought this institution to a state of glory and envy.

University Dental College promises high education standards with top notch technical facilities in a friendly and welcoming environment. The institution shapes the students to not only become efficient dental professionals, but also to be compassionate human beings, serving with quality.

Dr. Md. Wahiduzzaman
Chairman

MESSAGE

Prof. Dr. Syed Mozammel Hossain
Chairman
DMCR Foundation

I would first like to congratulate the Governing Body, the Principal, the staff and the students of University Dental College on the celebration of its Silver Jubilee. University Dental College has been the standard of exemplary purity and excellence since time immemorial and I am very happy to be a part of this milestone of University Dental College.

A college is much more than the bricks and mortar with which it is built. A college is its people, from the humblest to the highest functionary and the generations of students and teachers who make it into a flourishing institution.

This college, instituted in 1995, has been one of the leading Non-Government dental colleges in Bangladesh. The aim of this institution was to enlighten the scope of dentistry and to contribute in health service in Bangladesh. Since then this institute has been working on its goal.

I hope this silver jubilee program will be an enjoyable gathering of all UDC graduates and the dental summit will be a magnificent platform for the graduates to share and exchange innovations of current dentistry with the foreign faculties.

I wish this silver jubilee a great success.

Prof. Dr. Syed Mozammel Hossain
Chairman

MESSAGE

Dr. Md. Mosharraf Hossain Khandker
Director (Dental Education)
Directorate General of Medical Education

I am happy to know that the University Dental College, is celebrating ``UDC Dental Summit 2021 and Silver Jubilee Celebration`` on this year which is a special occasion for this College. As a historical milestone it indicates their existence for a quarter of a century, and while significant, is indicative of the youthfulness of the organization.

This college has been one of the most vibrant and dynamic institutions in the field of dental education. It has nurtured thousands of dentists to reach the zenith of their profession. From time immemorial, Bangladesh has been a Mecca of knowledge, education, and enlightenment. University Dental College, since its inception in 1995, has made an immense contribution to this legacy. The state of the art institute offers students the best possible clinical education complemented by opportunities in research and community service. I am also glad to know that, the freshers are trained in the sophisticated phantom head labs, fitted with the dental workstations for pre-clinical training simulating dental treatment.

I extend my warm greetings and felicitations to all those associated with the College and wish the silver Jubilee celebrations a grand success.

Dr. Md. Mosharraf Hossain Khandker
Director (Dental Education)
Directorate General of Medical Education

MESSAGE

Dr. Shahryar Nabi (Shakil)
Dean
Faculty of Medicine
University of Dhaka

With great delight, I have come to know that University Dental College is organizing “Dental Summit 2021 and Silver Jubilee Celebration” on 2nd October 2021. It gives me great pleasure to share legitimate happiness and a sense of pride.

University Dental College is one of the reputed and oldest dental college in Bangladesh with highly qualified and dedicated teaching staff. My heartiest congratulation to its bright students and outstanding graduates who are serving the dental health of the people in and outside the country.

While visiting the college I was impressed to see the First simulation dental lab in Bangladesh. Which they established to mark the Silver Jubilee of the College. I believe this lab will definitely help to improve the clinical skill of the student.

Moreover, the Dental summit will be the hallmark of a unique and dynamic educational experience in dental sector that will offer a platform to learn and exchange ideas with International and national renowned speakers participating in cutting edge scientific program.

My blessing and good wishes will always be with the college. May Almighty give them strength to continue their good work and serve the nation.

MESSAGE

Prof. Dr. Ali Asgor Moral
Dean

Faculty of Dentistry
Bangabandhu Sheikh Mujib Medical University

I am delighted to know that University Dental College is going to celebrate their 25th anniversary this year. On this joyous occasion, I congratulate all the graduates, students and faculties of university dental college.

University Dental College, after its establishment in 1995 has been one of the leading non-government dental colleges in Bangladesh. Since its establishment it has been playing a significant role in Dental education and community oral health service in Bangladesh. It is fascinating to know that UDC has produced more than one thousand dental surgeons since its beginning. These dental surgeons provide a vital role in our nation's oral health care system. UDC not only attracts the students from home, every year students from Nepal, India, Bhutan, Iran etc come to fulfill their dream of becoming a dental surgeon from this institution.

I hope UDC will continue to produce quality dental surgeons and make the nation's health management system stronger. My best wishes will always be with this institution.

Prof. Dr. Ali Asgor Moral
Dean
Faculty of Dentistry
Bangabandhu Sheikh Mujib Medical University

MESSAGE

Bangladesh Dental Society

Prof. Dr. Md. Abul Kasem
President
Bangladesh Dental Society

I am very glad to know that University Dental College (UDC) is celebrating its Silver Jubilee and going to organize “UDC Dental Summit 2021” at Radisson Blu Water Garden, Dhaka on 2nd October, 2021. It is indeed a happy coincidence that this renowned institution celebrates its silver jubilee at the same time that the country is celebrating its 50 years of Independence and ‘MUJIB100 YEARS’.

Encroachment in dental science is an endless practice and as a good practitioner, we always have to modernize and enrich ourselves with all the novel innovations and reforms. UDC has taken the proper footstep to exalt a giant leap to arrange such a dental summit that will cover the newest dental skills in the world and promote the passionate dental surgeons an opportunity to learn best management protocols and standards. Moreover, inauguration of Silver Jubilee celebration and the cultural show will cheer the participants and give them an opportunity to rejoice themselves.

From the core of my heart, I congratulate all members of the organizing committee & subcommittee of “UDC Dental Summit 2021 and Silver Jubilee Celebration” and also participants for leading the dentistry of Bangladesh to and prosperous future.

I wish the Silver Jubilee Celebrations all success. With all good wishes, Yours sincerely,

Prof. Dr. Md. Abul Kasem

President

MESSAGE

Bangladesh Dental Society

Prof. Dr. Humayun Kabir Bulbul
Secretary General
Bangladesh Dental Society

I am delighted to know that University Dental College is going to organize the "UDC Dental Summit 2021 and Silver Jubilee Celebration" at the capital of Bangladesh on the 2nd October, 2021.

The Summit will feature highly respected speakers who will share, discuss, debate and dissect significant new developments and scientific advancements that will hopefully impact the future of dentistry in Bangladesh. The planned program will defiantly provide opportunity for the participant to know about the new advancement of dentistry.

I am also glad to know that University Dental College has established a simulating dental lab for giving the better practical training to the pre-clinical students, which is very new in Bangladesh continuing. Aside from the excellent scientific program, the warm Reception and cultural Program will give participants a chance to network among colleagues while enjoying the cuisine, culture, and warm hospitality.

Hope the "UDC Dental Summit 2021 and Silver Jubilee Celebration" will succeed in achieving their goals of serving the dental health needs and improving the quality of life of the people of Bangladesh. This in turn will pave the way for "World Class Dentistry for Bangladesh" which is my lifelong dream.

MESSAGE

Prof. Dr. Mohiuddin Ahmed
President
Bangladesh Non Govt. Dental College Association

I am delighted to learn that University Dental College and Hospital is celebrating its Silver Jubilee on 10th April 2021 at Radisson Blu Water Garden, Dhaka. It is inspiring that a scientific seminar “UDC Dental Summit” is also going to be held from 2nd October at the same venue.

Since its inception in 1995, University Dental College is creating skilled dental graduates as per regulations of Ministry of Health and Family Welfare, BM&DC and University of Dhaka. Within the span of 25 years University Dental College has become one of the reputed institute in the field of dentistry. Graduates of University Dental College have spread all over the country and contributing in the field of oral health.

There is no doubt in my mind that University Dental College will continue to play a major role in the advancement of Dentistry in Bangladesh.

I congratulate everyone related to UDC on this very happy occasion and wish all the success to University Dental College and Hospital for a bright and prosperous future.

MESSAGE

Prof. Dr. Hosne Ara Begum
Principal
University Dental College

25 years of giving hope, 25 years of opportunity, 25 years of making a difference, 25 years of building smiles.

It is a moment of great significance and immense pleasure that University Dental College (UDC) is celebrating the milestone of 25 years of success as one of the prominent dental institute of the country. For the past quarter century, UDC has produced high quality dentists and provided excellent dental services to the patients and community. UDC has punched well above its weight and performed an impressive job, showing great leadership and innovation. Its commitment to purpose, good faith and sense of responsibility in its actions is well illustrated in the field of dentistry.

It has certainly traveled a long way in 25 years of its existence and is highly respected for giving the students all necessary advanced equipment and teaching needed for them to flourish and become excellent professionals.

The success of any educational institution is determined by the impact it creates in young minds which will one day become the pioneers of their generation. UDC is one such institution that has always been determined to help facilitate such inquisitive thought in the young minds of future dental practitioners, academicians and researchers. UDC has grown from strength to strength in the past 25 years since its inception as the first private dental college of the country. The institute's greatest accomplishment is to see its students ride the road of not only much deserved success, but to see them exercise profound wisdom in their actions, maintaining clarity of thought and feel a deep seeded urge to change the world. UDC could not be prouder to witness the success stories of its graduates all over the world. This significant milestone is the testimony of all the hard work of UDC's visionary founding committee, endeavouring teachers and relentless support staff which ensured an environment of constant education and learning to make a difference.

The corridors of UDC ring with cheer and joy as they witness silver jubilee in much gusto. In the midst of the bell of joy one can hear the promise the institute is making to every student to work towards ensuring a future for them that is brilliantly bright.

Principal

MESSAGE

Dr. Sharafat Hossain

Vice Principal
University Dental College

It gives me immense pleasure to address you all that University Dental College is going to celebrate its 25th anniversary this year. I feel proud to be one of its graduates. I even feel more proud who has the privilege to serve this institution as a Vice Principal.

University Dental College started its journey in 1995 with the determination to contribute to the dental education and health service in Bangladesh. Since then more than 1000 doctors has been graduated from this institution. Its compelling to share that many of our graduates have done their post graduation from Bangladesh as well as many reputed universities around the world. A significant number of our graduates are in essential positions serving our government and many of them has established themselves in different sectors of our nation as well as abroad.

University Dental College has been one of the leading non-government dental college science it's establishment. It has always been very concerned about the education policy and educational material for its pupils. Our students has been securing merit position constantly over the years at the professional examinations, this reflects the quality and capability of our faculty respectively. University Dental College always aims to develop its faculty with the latest equipment and material available. This dental summit will be another platform for our graduates to share, exchange and explore the newest innovation the dental science has to offer.

I hope and pray that University Dental College will continue to serve our nation with its good work and flourish even more in time.

I wish the silver jubilee a great success.

"Reminiscing the past, reflecting the present
and reckoning the future"

Greetings from the Press and Publication Sub
Committee

All praise and thanks to almighty Allah. It is our
prodigious honor and pleasure to be a part of
publishing Souvenir of UDC Dental Summit
2021 and Silver Jubilee Celebration organized
by University Dental College.

Completing Souvenir is not an easy chore. We
worked for updated thinking, modern
concepts and new readership. Coming across
several months of joys hardware standing tall
against the odds and by virtue of our
teamwork enthusiasm vigor and dedication,
leaving no stone unturned we proudly promise
you that this Souvenir will be unique and you
could keep as a record of memories.

It would be an act of ungratefulness if we failed
to express our sincere & acknowledgement
specially to Dr. Md. Wahiduzzaman, Chairman
Governing Body for trusting and giving us
opportunity to be a historical part of it and also
hardworking organizing committee, sub-
committee of event, Line Work and those given
abstracts of oral and poster presentations
from home and abroad with welcome
message of higher official UDC as well as
honorable guest and also various sponsor
companies.

We invite all participants to read and immerse
yourself in the unfolding art and be exalted
and also Wish you all a fairer, healthier and
professionally fulfilling year.

Thank you

Anam Ahmed

I am indeed happy to know that the University Dental College is celebrating the Silver Jubilee of its foundation this year. I am happy and proud to be a convener of this celebration committee.

During the last 25 years of its existence, the college has provided quality education and clinical experience to thousands of students. It is a matter of great satisfaction that the Doctors turned out by the institution are providing valuable service to people not only in Dhaka but also in other parts of Bangladesh and even outside.

On this happy occasion the silver jubilee committee is going to release a souvenir which would include articles in the field of dental education and research.

I congratulate the University Dental College on the joyous occasion of its silver jubilee and convey my best wishes to the Chairman, Principal, Teachers and non teaching staff and students of the college.

Come, join in the festivities.

Cheers! And God bless!

I am happy and honored to be a part of the Silver Jubilee celebration of University Dental College to be held on 10th April this year. University Dental college, started its journey in 1995 as a project of DMCR Foundation, has passed a glorious 25 years producing over a thousand dental surgeons. I congratulate all teachers, staff and students of this reputed institution on this magnificent occasion. The collective effort of all made this a leading institution in the field of dental education in Bangladesh.

I believe this institute will continue its efforts to provide Dental education and health service with latest innovation to its pupils and community with modern educational materials and innovative technologies of contemporary dentistry.

I extend my warm greeting and felicitations to all those associated with the college and wish the Silver Jubilee celebration all success.

It gives me great pleasure to welcome you all national and international presenters, delegates from Bangladesh and across the world and generous sponsors in the UDCH Dental summit 2021 Dhaka, Bangladesh, on 2nd October 2021. It is also the 25 years celebration of University Dental college and Hospital.

I hope our summit will support the dental professionals and students with the rapid advances being made in basic research and the evidence generated into clinical practice. Considering current pandemic issue, I would like to thank all of our eminent keynote speakers from India, Nepal, Bangladesh and Doctors, Interns and Students of University Dental college.

I would like to thank sponsors to whom we are very grateful.

Dear Participants,

On behalf of the Reception Subcommittee, it is my great pride to welcome you all in the mega event of UDC Dental Summit 2021 and Silver Jubilee Celebration organized by University Dental College at Radisson Blu Water garden.

University Dental College has rendered remarkable service to the public by providing and promoting Dental Education, Dental services and Research. The dentists who have come out of this sanctified institution have brought good name and fame not only in Bangladesh but also worldwide.

Moreover, this Dental summit brings together leading international and national speakers to provide updates and exchange view on the various aspects of modern dentistry. I wish Participants will also enjoy a memorable reminiscence session followed by cultural show & gala dinner.

Finally, I thank to Dr. Md. Wahiduzzaman sir, Chairman Governing body of UDC for his guideline and support, as well as organizing committee, subcommittee, graduates, students, press and sponsors for their hard work to make the Dental summit memorable.

I convey my best wishes for the success of the grand occasion.

Dr. Huda Mannan

Dr. Yeasmin Laila
Convener

As a member of the cultural committee convener, I heartily welcome you all on the behalf of University Dental College for the prestigious occasion of our institution celebrating its 25th Annual Day on the event of completing its 25 golden years. I would first like to congratulate the Governing body, Principal, Faculty members, staff and the students of UDC on the celebration of this precious event. I am honored to be a part of this major milestone.

With the vision of the Honorable trustees and under the dynamic leadership of our honourable Principal Prof. Dr. Hosne Ara Begum, this institution has been true to this vision and has made commendable progress over the past to and a half decades in its pursuit to attain excellence in the field of dentistry. This institution aim to ensure that the lamp of education glows bright and always strive to continue growing this vision.

I wish the success of UDC Dental Summit 2021 and its Silver Jubilee.

President, UDC Alumni

It is a matter of great happiness and joy that the University Dental College, one of best dental colleges in the country, is celebrating its silver jubilee.

On behalf of the university Dental College Alumni Association , it is my privilege to invite you to the mega event of University Dental College being held on 10th April 2021. Our association is happy indeed to welcome you all and we are looking forward to meeting in one arena to exchange views. Indeed we are expecting a large number of our Alumni to participate in this advent.

I wish the silver jubilee celebration all success and will always support and effort aimed at improving this premier dental college.

Md Hossen.

Dr. Mahmud Hossain

Dr. Sharafat Hossain
Convener

It gives me great pleasure to address you all on this grand occasion, where University Dental College is stepping towards the milestone of 25 year celebration. It is surely a prestigious moment for us to be a part of this esteemed institution. As the convener of International Affairs Committee, I humbly thank all the faculties from home and abroad who will share their valuable expertise even in this challenging times. I am sure they will enrich many of us with the recent innovation of dentistry in our work field. I believe this UDC Dental Summit & 25th Year Celebration will be a lovely gathering of colleagues where they will cherish their good old memories, at the same time upgrade their competency in modern dentistry. I thank all the committee members for their valued support for making this event possible.

I wish this UDC Dental Summit & 25th Year Celebration a big success.

Convener

As the Convener of the Finance Committee, I congratulate all teachers, staff and students on the grand occasion of 25th year celebration of University Dental College. This is indeed a prestigious occasion for all us. University Dental College, started its journey in 1995 with the noble purpose of contributing to the Dental education and community health service in Bangladesh. Over the years it has proven itself as pioneer in the field of dental education in Bangladesh. Our graduates serving leading positions in the health sector in Bangladesh and serving the nations oral health care needs. UDC Dental Summit and 25th year celebration will be a blissful event for all the participant of this institute to rejoice. I am sure it will be an intellectual event as well.

I want to extend my sincere thanks to the organizers, speakers, to our distinguish guest and to our corporate sponsors.

I hope and pray for the bright future of this institute and success of the UDC Dental Summit.

Prof. Dr. Abu Ahmmad Shahidul Islam

A Short History of Modern Dentistry Practices in Bangladesh

Prof. Dr. Syed Mozammel Hossain¹, Dr. Md. Wahiduzzaman¹,
Prof. Dr. Hosne Ara Begum¹

As one of the oldest medical professions, the evidence of dental treatment dates back to 7000 B.C. in the Indus valley Civilization. A 9,000-year-old teeth from a graveyard in Pakistan bore the mark of having been drilled to remove decay. However, it was not until 5000 B.C. that the documented knowledgebase related to the dentistry and tooth decay were available. In Egypt, dental procedures such as fillings, drilling, replacement of teeth bound with gold wires existed since around 3000 B.C. Roughly about the same time, an ancient Sumerian text described a "tooth worm" as the cause of dental caries. Such a belief is thought to have persisted in India, Egypt, Japan, and China and was not proven false until the

mid-1700s.

Pierre Fauchard (1678-1761), a French physician, is credited with inventing modern dentistry techniques. Although there existed an age-old literature on dental health and care during Fauchard's time, dentists did not yet emerge as professional practitioners (it was the barbers who used to removed teeth!). The findings and techniques described in Pierre Fauchard's book, *Le Chirurgien Dentiste*, (*The Surgical Dentist*), paved the way for modern dentistry. He also contributed to remarkable improvisations of dental instruments, often adapting tools from watchmakers, jewelers, and barbers.

Pierre Fauchard

In 1840, the world's first dental School, the Baltimore College of Dental Surgery was established offering the Doctor of Dental Surgery (DDS) degree. Twenty years later, the American Dental Association (ADA) was formed while the first university-affiliated dental institution, the Harvard University

¹ The authors are affiliated to Dental and Medical Community Services And Research (DMCR) Foundation, Dhaka, Bangladesh.

* Marsfield Dental Care (2017). "A Brief History of Dental Practices throughout the Ages", blog available from online sources.

Dental School, was set up in 1867. The United Kingdom through a major reform in 1921 limited the practice of dentistry by only those who were professionally qualified.

The discussion on the history of dental practices in this sub-continent seldom takes place. Dr. Rafiuddin Ahmed—an Indian dentist, educator, and later a minister in the West Bengal cabinet—founded the first dental college in this region of South Asia in 1920. Having received his dental degree (DDS) in 1919 from the University of Iowa College of Dentistry and Dental Clinics, USA, he returned home to set up the institution, *Dr R Ahmed Dental College and Hospital* in Sealdah, Kolkata. Later, the De'Montmorency College of Dentistry was established in Lahore, Pakistan, in 1934. After the partition of Indian subcontinent, the first dental college of now Bangladesh, *Dhaka Dental College*, was established in 1961.

Dr. Rafiuddin Ahmed

The history of dentistry in Bangladesh, however, stretches far back when in the absence of formal dental education and training the required treatment was carried out by self-taught individuals, often referred to as charlatans or quacks. These individuals would travel from door to door, offering various medical services to treat ailments using techniques ranging from herbal medicines to sheer fraudulent remedies. Many of these individuals would also carry out tooth extractions, which were then the only available means to resolve toothache. Oral healthcare and hygiene were virtually non-existent.

The initiation of the modern era in Bangladesh's dental practices was pioneered by Dr Md. Fakhruzzaman, popularly known as Dr F. Zaman, and Dr. Abu Haider Sajedur Rahman, widely known as Dr. Mastana. After the partition of India, both enrolled themselves into the first batch of then Dacca Medical College MBBS course. Dr Zaman and Dr Mastana were meritorious, outgoing, and versatile individuals having instinctive aptitudes for art, drama, and music along with their academic accomplishments. While in the 2nd year of his MBBS course, Dr F. Zaman recognized the massive void in the field of dentistry in East Pakistan. He could realise the lack of knowledge and awareness about oral health care and foresaw people's dire need in the area. He decided to discontinue his MBBS course and take the challenge of admitting himself in the De'Montmorency College of Dentistry (in Lahore, Pakistan). He completed his Bachelor of Dental Surgery (BDS) degree and returned to Dhaka as the first qualified dentist of East Pakistan. He started practicing as a private practitioner in 1955 as there would be no opening for dental surgeons in government hospitals of East Pakistan at that time. He established a fully equipped private dental clinic at a Dhaka location that would later be named as Bangabandhu Avenue. In the next 4-decades of his

Dr. F. Zaman

professional life, through his hard work, dedication, passion about spreading dental services to ordinary people through charities and free-treatment in his village, and care for young professionals he would establish himself as a father figure in the profession. In the meantime, Dr. Mastana completed his MBBS course but felt the lack of professional dentists in East Pakistan and thus followed his peer Dr. F. Zaman by enrolling himself at De'Montmorency College. Dr. Mastana became the first person to obtain an MBBS and a DDS degree. He was also a popular thriller writer of his time. Both Dr Mastana and Dr Fakhruzzaman were later admitted as Fellow, International College of Dentist, USA, for their dedicated work and contribution.

Through his charismatic character and relentless efforts, Dr F. Zaman contributed enormously to mass awareness- building and generating interest in the dentistry profession. His rural dental camps were often the only source of receiving professional dental treatment and advice for many ordinary people. His competence, professionalism, and duty of care for patients were highly regarded. He had the opportunity to treat Bangabandhu Sheikh Mujibur Rahman and became deeply motivated by Bangabandhu's vision of working selflessly for freeing our people from exploitation and hardship. Dr F. Zaman also had Sher-e-Bangla A.K.M. Fazlul Haque, Maulana Bhashani, Pollikobi Jasimuddin, Shaheed Jononi Jahanara Imam and many more as his patients. In establishing Dhaka Dental College, Dr. F. Zaman played an influential role.

The journey of Dhaka Dental College began in 1961 with just six students in a small classroom beside the dissection room of Dhaka medical College. There were no qualified teachers for three months until when Dr. Mastana headed back from Lahore with his BDS degree and joined as a faculty member. He used to teach almost all the dental subjects up to the 3rd year. All other medical subjects were taught by the faculty members of the Dhaka Medical College.

Prof. A H S Rahman

The first batch of BDS students graduated in 1965. Before our liberation, very few students used to apply for dentistry, but it is Dr. F. Zaman and Dr Mastana who showed the prospect of dentistry as a professional by their achievements. This was one encouraging factor for many to look for the dentistry as a respectable carrier option.

Out of the six students of the first batch at Dhaka Dental College, five, namely Dr. Ashraf Hossain, Dr. Syed Mozammel Hossain, Dr. Md Emadul Hoq, Dr. Al Mamun Ferdousi, and Dr. A.B.M. Nazirul Quaium graduated successfully and contributed heavily to the development of the discipline in Bangladesh.

Prof. Syed Mozammel Hossain

Prof. Ashraf Hussain

Prof. Emadul Haque

Prof. Al Mamun Ferdousi

Dr. A.B.M. Nazirul Quaiyum

In 1998, a new and independent campus of Dhaka Dental College in Mirpur was inaugurated by the Honorable Prime Minister Sheikh Hasina. All its departments were shifted from Medical College premises by 2000. With 200 beds, it is now the largest government dental college and hospital in Bangladesh.

Dental colleges and institutes by the private sector came into operation from 1995. Given the size of the population, it is almost impossible for the government alone to produce adequate number of dentists. Bangladesh has 6 dentists per 100,000 (One lac) people in comparison with about 21 in India, 11 in Sri Lanka, 27 in Thailand, and 12 in Nepal². Therefore, it only became imperative for the policymakers to consider alternative approaches to fill ever-growing need. Pioneer Dental College, City Dental College, and University Dental College—all being affiliated to Dhaka University—were the first private sectors initiatives in this sector. Despite faced with many challenges, twelve non-government dental colleges are actively running today in 2021. The potential for the growth and development of Bangladesh's dental sector is huge and the professionals involved can contribute to enormous well-being of the mass population.

The What, Why, When, How of Lateral Window Sinus Lift

Dr. Ashwini Bhalerao

M.D.S (OMFS, Mumbai)
MFDS RCPS (Glasgow)
Consultant, oral & maxillofacial surgeon
Oral Implantologist

Abstract:

Every general practice is an implant centric practice today. However, the population which needs implants is the senior generation who rarely have sufficient bone ... So what do we do? We augment .. with artificial bone. Deficiency in the height of posterior maxilla is the most common.. The way to build this height is by raising the sinus membrane from the floor intact and placing bone beneath it and the floor of the sinus. We allow this bone to mature, then we place implants and restore them.. This procedure is called the Lateral Window direct sinus lift and it is the most predictable way of raising the alveolar ridge height from zero to anywhere like 10-15 mm. My lecture will cover the treatment planning, the procedure and the management of complications in direct and indirect sinus lift.

Algorithm for Pink Aesthetics around Implants

Dr. Rita Singh

BDS, MDS
Periodontics and Implantologist
Vice President
Nepalese Society of Implant Dentistry.

Abstract:

Implant dentistry has already been established as a predictable treatment modality for replacing missing non-restorable teeth with excellent clinical success rates. During the last decade, the focus of implant research has shifted from the osseointegration of the implant to its esthetic integration in the smile. However, the esthetic rehabilitation by dental implants constitutes a major challenge for dentists. The final esthetics of an implant restoration in the esthetic zone is dependent not only upon the appearance of the crown, but also equally on the position and appearance of the surrounding gingival tissues. The optimal management of the interplay between bone, soft tissues and prosthetics determines the esthetic outcome and the long-term stability of soft tissue esthetics. In my lecture, I will be talking about the algorithm that is followed to optimize esthetics in my cases.

Blood concentrates a wonderful regenerative material for periodontal esthetics

Dr. Anirban Chatterjee

Consultant- Apollo Hospital, Wockhardt Hospital
Manipal Hospital- Bangalore
Professor, Periodontics and Implantology

Abstract:

The quest for periodontal regeneration is constant. The understanding of role of growth factors in periodontal wound healing and regeneration has given a new perspective towards treatment of periodontal bone defects. A new era in use of growth factors - platelet-rich plasma gave a boon in the field of medicine and dentistry. Numerous variants of these platelet concentrates have been discovered after PRP. The blood concentrates are a rich source of growth factors, these growth factors help in wound healing Perio-esthetics is a branch of Periodontology which involves various procedures like root coverage, depigmentation gingivoplasty . In the field of implants to develop the operative site to achieve prosthesis that are esthetically pleasing various perio esthetic surgeries are performed. These procedures too like other periodontal procedures rely on the optimum healing of tissues. There is also requirement of soft tissue graft in these procedures. Blood concentrates find application as a soft tissue graft. Studies have shown great results with the use of blood concentrates as a soft tissue substitute. Being an auto graft it has an added advantage over there grafts. In cases where auto graft is used from the palate it leads to the addition of a second surgical site , this can be overcome with blood concentrates. Use of blood concentrates in perio esthetics is indeed a boon. The use of this wonderful material seems to be answer to most of the challenges faced in regeneration.

"PREDICTABLE TACTICS FOR ENDODONTIC EXCELLENCE."

Dr. Amit Jena

BDS, MDS

Conservative Dentistry & Endodontics Professor & HOD

Dept of Con. Dentistry & Endodontics

SCB Government Dental College and Hospital, Cuttack, Odisha, INDIA.

Abstract:

Human teeth anatomy consists of highly complicated multi-planar curved and anastomotic channel spaces. Effective, safe and predictable navigation with instruments can be challenging. This lecture aims to offer solutions in different clinical instrumentation problems with tricks in treating curved canals.

Orthodontic Management in Multidisciplinary Approach

Prof. Dr. Mohammed Zakir Hossain

BDS, FCPS, PhD

Professor & Head

Department of Orthodontics and Dentofacial Orthopedics

University Dental College and Hospital, Dhaka, Bangladesh

Chief Orthodontist, Ortho Dental Care

Abstract:

A large number of orthodontic patients ranging from mixed dentition to adult dentition with dental and skeletal deformity are attending and seeking orthodontic treatment for aesthetic and functional demand. Appliance design & treatment mechanism selection is important for different individuals.

The objective of this paper is to present the management of a few case reports by multidisciplinary approaches ranging from growing stage to adolescent.

As the strength and quality of Orthodontic training is improving day by day, Orthodontic management & service delivery are also improving. Cases presented here with multidisciplinary approach resulted improvement of aesthetics and functional need. The presentation will highlight the scenario of progress of orthodontic education and treatment management in Bangladesh.

Lip Repositioning: A Less Invasive and Highly Predictable Solution for Excessive Gingival Display

Dr. Manoj Humagain

Professor and Head

Department of Periodontics and Oral Implantology

Kathmandu University

Abstract:

'Perfect and harmonious smile' has been the common desire of many people in this era. Smile has significant role in the expression, appearance and in the development of self-esteem. Excessive gingival display, which is commonly termed as 'gummy smile' will adversely affects smile aesthetics and is therefore undesirable to many people. Perseverance and application of such technique shall provide many more a horizon to this young but highly imaginative and creative technique in periodontal therapy to charter. This presentation will be focused on the brief overview of classification of excessive gingival display with treatment modalities on each. A case series with ten successful cases will be discussed with highly predictable outcome.

Hands-on Programme

2 October 2021 - 9 AM to 1 PM at Radisson Blu Water Garden

Registration Details:

Live Surgery Demonstration Lateral Window Sinus Lift

3 October 2021 - 10 AM at UDC

Abstract:

Every general practice is an implant centric practice today. However, the population which needs implants is the senior generation who rarely have sufficient bone ... So what do we do? We augment .. with artificial bone. Deficiency in the height of posterior maxilla is the most common..

The way to build this height is by raising the sinus membrane from the floor intact and placing bone beneath it and the floor of the sinus. We allow this bone to mature, then we place implants and restore them..

This procedure is called the Lateral Window direct sinus lift and it is the most predictable way of raising the alveolar ridge height from zero to anywhere like 10-15 mm. My lecture will cover the treatment planning, the procedure and the management of complications in direct and indirect sinus lift.

CERTIFIED IMPLANT COURSE

4 October 2021 - 11 AM to 12 PM at Gulshan Club Ltd.

- Introduction to implantology (bioline implant series)
- Discussion about case selection
- Indications and contraindications of dental implants
- Case planning (flap design, surgical stent, drilling protocol, implant size selection, suturing)
- CBCT and OPG reading
- Discussion about prosthetic components and planning
- Hands on implant placements on dummy models
- Live hands on surgery on patient
- Live surgery case discussion & planning
- Technical & biological complications associate with connecting teeth to implant
- Questions and answers
- Certificate distribution

Dr. Anirban Chatterjee

Consultant- Apollo Hospital, Wockhardt Hospital
Manipal Hospital- Bangalore
Professor, Periodontics and Implantology

Abstract:

Tooth loss is very a very common problem. A dental implant is one of the treatments to replace missing teeth. Their use in the treatment of complete and partial edentulism has become an integral treatment modality in dentistry. Dental implants have a number of advantages over conventional fixed partial denture. A high success rate (above 97% for 10 years) A decreased risk of caries and endodontic problems of adjacent teeth. Improved maintenance of bone in edentulous site. Decreased sensitivity of adjacent teeth. Advanced procedures in implants as made it possible to place implants in almost all conditions of edentulism.

Oral Manifestation In Covid-19 Patient: A Narrative Review

Abstract: Covid-19 is a global pandemic viral disease causing morbidity and mortality which is the foremost public health problem crossways around the world caused by SARS-CoV-2 characterized by fever, dry cough, headache and fatigue, sore throat, dyspnea, abdominal pain, vomiting and diarrhea with several oral mucosal manifestations with gustatory dysfunction. Oral health of Covid-19 patients can be compromised from the direct viral infection or may result from systemic deterioration, or other factors. The aim of the narrative review to summarize the available literature from various databases that provide an overview of the potential oral manifestations and also probable path of infection and the interferences for dental practice in Covid-19.

Periodontal Diseases Among The Type-1 Diabetes Mellitus Patients In Dhaka, Bangladesh

Abstract: Periodontal disease and diabetes mellitus are the two most prevalent chronic diseases and global burden in the world. An increasing trend of periodontal disease is reported among diabetic patients in Bangladesh. This study, therefore, aims to investigate the association of demographic characteristics, lifestyle factors, diabetic-related factors, and oral hygiene practice with periodontal disease among type 1 diabetes mellitus people in Bangladesh. About 30.2% of the respondents had moderate periodontitis, followed by mild periodontitis 28.6%. The majority of respondents (30.8%) had mild gingivitis and only 14.8% had moderate gingivitis. Furthermore, proportions of periodontitis and gingivitis were positively associated with age and lower education. A significant association of periodontitis was found with the duration of diabetes and frequency of toothbrush (42-fold greater). These findings imply that dentists should emphasize well diabetes control for prevention and slowing progression of periodontal disease.

Feeding Aid Prosthesis For An Infant With Cleft Lip & Palate: A Case Presentation.

Abstract: Cleft lip & palate is a birth defect & one of the most common craniofacial anomalies of humans. A child born with this condition may experience difficulties in feeding due to lack of seal of oral cavity, difficulty in feeding affect on nutrition & health of infant. Feeding difficulties should be assessed & intervened as early as possible. It's a case of multidisciplinary approaches which initiated by prosthodontist by providing feeding aid prosthesis which offers separation of oral cavity, nasal cavity & create negative intraoral pressure during sucking. This case report represents a fabrication of feeding aid prosthesis for a 15 days old neonate born with cleft lip & palate.

Risk Factors Of Early Childhood Caries Among 5-9 Years Old Children In Dhaka Community Medical College And Hospital

Abstract: Dental caries is a major oral health problem affecting 2.43 billion people (35.3% of the population) worldwide. This study was done to find out an actual understanding of the burden and associated factor of dental caries among children in Dhaka Community Medical College Hospital. Study population was the children both male and female from the age of 5-9 years. Total 240 data (120 Cases, 120 Controls) was collected. Ethical approval was collected from the Department of Public Health, North South University. Dental caries was prevalent among 0-4 years-old children 47.8% and it was more prevalent (50.5%) in the children whose age was between 5-9 years. Future research should focus on confirming some of the unique relevant associated factors for dental caries identified in our study, including late adoption of brushing, frequent consumption of sugary snacks between meals, and consumption of fresh fruits and flavored milk.

Comparison of Efficacy of Various Irrigation System in Endodontics.

Abstract: Root canal sterilization is one of the important step of root canal treatment. There are several irrigation systems available in dentistry. In this study, we compared different root canal irrigation systems from previously published 15 international journals. Their results are arranged in tabular and pie chart form and are counted as most effective, moderately effective and less effective. This result shows that among all the irrigation system Endovac system proves to be the most effective.

Keywords: Irrigation, Endovac, Endoactivator, Ultrasonic, Laser and Apical negative pressure.

Periapical abscess a neglected issue

Abstract: Periapical abscess is frequently occurring infectious process known to the health practice. Periapical abscess is polymicrobial, comprising of strict anaerobes. Periapical abscess produces pain, destruction of dental tissue & surrounding bone & may affect the permanent tooth that can affect the oral health related quality of children. The majority of periapical abscess respond to medication and surgical treatment. The causes of periapical abscess indicate the need for school & community based preventive strategies like encouraging -oral health & preventive dentistry programmes & early treatment intervention & dental health education.

Precautions in Dentistry Against The Outbreak of Corona Virus.

Abstract: The outbreak of COVID-19 has become a severe pandemic around the world. Its incubation period is 1-14 days, mostly 3-7 days. Due to the relatively confined environment of dental clinics and the unique nature of dental procedures, both dental personnel and patients can easily get infected through currently known respiratory droplet transmission, aerosol transmission, close contact transmission and other ways, inducing cross infection. Dental practitioners are facing unprecedented challenges due to the high risk of exposure to droplets and aerosols from saliva and other body fluids during dental procedures.

Diagnosis, staging and management strategies for osteonecrosis of the jaw : An update review

Abstract: The growing number of osteonecrosis cases involving the maxilla and mandible has become a major concern in oral cancer treatment. Previously in 2009, bisphosphonate was identified for causing osteonecrosis and named by Bisphosphonate related Osteonecrosis of Jaw; BRONJ. However, other than bisphosphonate, Osteonecrosis was still appearing in the jaw. Use of other antiresorptive drug- 'denosumab' and antiangiogenic therapies has been established as a cause of osteonecrosis also. Though these drugs are an essential part of oral cancer- chemotherapy protocol and osteoporosis treatment. Therefore, a new nomenclature, Medication related osteonecrosis of jaw; MRONJ instead of BRONJ has been approved in 2014 by a position paper. In this position paper, American association of oral and maxillofacial surgeons (AAOMS) revised and updated the diagnosis, staging and management strategies for osteonecrosis of the jaw.

COVID-19 Vaccination Hesitancy in Bangladesh, United States and United Kingdom: A Comparative Review

Abstract: Background: Vaccination is crucial to address the COVID-19 pandemic but hesitancy remains a barrier to full population inoculation.
Objectives: To compare COVID-19 vaccine hesitancy so as to contribute towards overcoming this barrier.

Methodology: "PubMed-MEDLINE" and "Google Scholar" database search was conducted with the search terms "Covid-19", "vaccine", "hesitancy" and "survey". The inclusion criteria were: national surveys including at least 1000 people of all gender, race and socioeconomic status. The exclusion criteria were surveys conducted on specific groups of people.

Results: In Bangladesh, 32.5% of participants showed COVID-19 vaccine hesitancy. 19.6% of the total participants in all three countries showed hesitancy.

Conclusion: Bangladeshis show the highest prevalence of hesitancy towards the COVID-19 vaccine.
Recommendation: Evidence-based promotion of COVID-19 immunization programs should be done.
Keywords: Covid-19, vaccine, hesitancy, survey.

Shaping the Future of Dentistry with Modern Technologies.

Abstract: Dentistry has started to evolve by combining human knowledge & ability along with machine learning. The 4th industrial revolution will introduce artificial intelligence based modern technology in oral healthcare, patient informatics, surgical procedures and digitalized patient counseling. Today, some of those technologies are already in use while others are still in development. Evaluation must be done on every scenario regarding this coming era of dentistry so that a friendly oral healthcare system can be established for all kinds of people of a particular society

Periodontal Condition Among Alzheimer's Disease Patient In A Selective Tertiary Level Hospital Dhaka- "A Descriptive Study"

Abstract: Periodontal disease known as gum disease is a set of inflammatory condition affecting the tissue surrounding the tooth. Dementia is the name for a set of symptoms that includes memory loss and difficulties with thinking problem solving or language. Gum disease may increase the risk of Alzheimers. A link between bacteria that cause gum disease and Alzheimers disease. Porphyromonas gingivalis bacteria are found in both periodontal disease and Alzheimers disease patient mouth.

Information we should know about COVID-19 vaccine

Abstract: COVID-19 vaccine is intended to provide acquired immunity against Severe Acute Respiratory Syndrome Coronavirus 2(SARS-CoV-2). Some COVID-19 vaccines like Pfizer-BioNTech vaccine & Moderna vaccine have demonstrated efficacy as high as 95% in preventing symptomatic COVID-19 infections. Immunity from vaccine might not last forever. So, getting large number of people vaccinated quickly will decrease the number of COVID-19 patients. Health workers & old people should be prioritized first for COVID-19 vaccination. Sometimes, people might get fever & body pain as side effects. For safety assurance, people must wear mask, wash hands frequently & keep safe distance from each other even after vaccination.

Consequences and Prevention of COVID-19 For Dental Students

Abstract: Covid-19 is a viral infectious disease caused by SARS-CoV-2. It is one of the deadliest viruses in human history. It has not only presented challenges to public health but also to our economic situation, social and personal life. People from all walks of life are affected by it. It has highly affected the academic and personal lives of students worldwide. In our poster we mainly discussed the impact of covid-19 on dental students and how to keep up with them. We highlighted the mental and physical stress presented to dental students. It is also fueling financial crises and social media addiction of our students. Furthermore, their academic progress is being compromised. It's high time we shed light on these issues and raise awareness.

COVID -19 AND SAFETY PROTOCOL FOR DENTIST

Abstract: The COVID -19 pandemic has become a worldwide, significant public health challenge. Dental care providers are at high risk due to the nature of their profession, which necessitates close proximity to the patients oropharyngeal region and the use of droplet and aerosol-generating procedures. Several guidelines have been published from many reputed authorities which can help the dentists and other oral health workers to protect themselves from this deadly disease. Although most of those protocols are similar but can be practicable in our country. These includes several steps such as prescreening the patients, pre appointment safety measures and overall sterilization and disinfection of the instruments and operatory. In this poster all those protocols are summarized to find all information in one place.

Serology Test: Role of Effective Safety Measurement for the Dentists in Covid-19 Pandemic

Abstract: COVID-19 serological tests measure the presence of antibodies in the blood generated by the immune system when encountering the SARS-CoV-2 virus. In a dental setting, this test is useful to mitigate the risk of transmission to the dentist, staff, and other patients. If a patient tested positive prior to dental treatment, that patient can be rescheduled and the data can be reported to the correct agencies. This type of elimination control—removing the sick patient from the office prior to treatment—is the highest and most effective form of infectious disease control.

From the Desk of Head of the Department of Anatomy

I am glad to participate to the ceremony of 25 years celebration of university dental college. For this grand occasion I would like to congratulate our Honorable Chairman sir, respected Principal madam, Vice principal sir, all my respected Directors, all senior and junior colleagues and my beloved students. In order to produce skilled and quality physician it is essential to properly teach the students the complex and basic aspect of anatomy with histology. Our department of anatomy is running with this motto to achieve this goal. The Department of Anatomy is dedicated to teaching human anatomy and histology both local and foreigner dental students of this well reputed institute. The department has a spacious dissection hall where cadavers and prosecuted parts are available for demonstration to the students. We have well equipped histology lab with good quality microscope slides of various tissues and organs are available for study. Audio visual aids such as overhead projectors and slide projectors are used in the department to facilitate reinforcement of knowledge. The museum of department has wet specimen and 3d models. For proper teaching we have skilled teaching staff. I would like to end my speech by thanking everyone on behalf of my department.

Prof. Dr. Sultana Parvez
Professor and Head
Dept. of Anatomy with Histology
University Dental College

From the Desk of Head of the Department of Dental Anatomy & Physiology

It is my pleasure & I am delighted to express my gratitude & thanks to the Dynamic Authorities of UDC for arranging the prestigious & dignified program of "UDC Dental Summit 2021 & Silver Jubilee Celebration going to unveil the screen on 10th April 2021.

The University Dental College is one of the leading Dental College in the Private sector & I feel proud to declare that I have been working in the Dental Anatomy Department since its inception in 1995. The Academic & Clinical side of UDC is rich with faculty members, well equipped academic facilities, modern & scientific museum labs & congenial environment. Results of the professional examination is tremendously excellent & appreciable. The foreign students are also doing well. The Authorities inspire the students to take part in co-curricular activities like cultural programmes, games, sports & celebration of national important days.

Today in this great occasion of Silver Jubilee Celebration I convey my respect and remember the contribution of our late board of trustees & Executive Director Dr. Mirza Ali Haider and our Let Chairman Mr. Mirza Ali Behrouze Ispahani whose endeavour brought the dream of UDC into reality, I pray to the Almighty for their eternal peace. On this happy occasion I also take the opportunity to congratulate the UDC management on having a harmony of the Teachers, administrative staff and the students to blend them into a productive team and wish the program success in future ahead.

Begum

Prof. Dr. Fahmida Begum
Professor (C.C.) & Head
Dept. of Dental Anatomy
University Dental College

From the Desk of Head of the Department of Physiology With Biochemistry

University Dental College is one of the pioneer institution for dental education and health services in Bangladesh which has been a significant provider of oral health care to patients and an excellent clinical based dental education to dental students for 25 years since 1995. This institution is being managed by highly qualified and skilled authorities and faculty members. The authorities are always striving for upgrading the teaching methods and take special care to maintain the standard. Departmental activities, student's updates and any problems related to study can be shared in monthly meeting. Parents are being informed about students' progress after monitoring. Students not only acquire theoretical knowledge but also get practical laboratory training. Here talent of poor students are not overlooked and students with best results are highly appreciated.

Every year, UDC offers some excellent platforms including cultural week, indoor and outdoor games, debate, picnic and study tour to enhance student's creativity and to develop better mental health. UDC is committed to provide better education in a friendly and healthy environment. This renowned institution has all the facilities for the students to complete their journey to be a very skilled dentist. Students not only go through some books for exams they prepare themselves as well disciplined and efficient dentist to serve the mankind. Highly standard teaching & learning methods of this institution attracts not only the Bangladeshi students but also the international students.

All the teachers of department of Physiology & Biochemistry are truly honored to be a part of UDC. Hopefully UDC will keep their gained reputation and touch the milestone of success in upcoming years.

Dr. Mahaboba Rahman

Dr. Mahaboba Rahman
Assistant Professor & Head
Dept. of Physiology & Biochemistry
University Dental College

From the Desk of Head of the Department of Science of Dental Materials

Allahhumma Salliala Sayedina Mohammadinin Naiel Umme Wa Alihi Wa Sallim.

It is a great pleasure to me that University Dental College is going to publish. Souvenir on the grand occasion of UDC Dental Summit 2021 & Silver Jubilee Celebration on 10th April, 2021. Private Dental College was proposed in March/1995.

UDC was started in October/1995. There were 3 departments, Dept. of Science of Dental Materials (SDM), Dept. of General Anatomy & Histology and Dept. of Physiology & Biochemistry were run by me. Dr. Mizanur Rahman Jamali and Dr. Noor Mohammad respectively in 1995. In course of time UDC is composed of all depts.

My dept. is very important one for dentistry. Without SDM dept. Dentistry cannot be a dream. SDM dept. is now served by a group of teachers. Teachers are highly qualified, experienced. SDM dept. has a well equipped laboratory from where students can learn OSPE and complete their assignments, write their Lab. Khatas, Lectures for SAQ, MCQ are taken in a broad A/c room in different ways. We take term and professional examinations in a well furnish & lecture room, and some of the students get honours marks (85%) every year under Dhaka University. Some excellent students in Dhaka University.

I wish every success of Souvenir 10th April/2021 and UDC. May Allah protect us.

Amul

Prof. Dr. Md. Abdul Kadir
Professor and Head
Dept. of Science of Dental Materials
University Dental College

From the Desk of Head of the Department of General & Dental Pharmacology

I am delighted to send this message on behalf of me and on behalf of General & Dental Pharmacology. It gives me immense pleasure and joy to welcome all respected members of director panel. On this precious event it is my great pleasure to welcome all the respected members of UDC faculty, distinguished delegates, invitees, participants and organizers of the "UDC Dental Summit & Silver Jubilee Celebration". I am fortunate to see the growth and progress of UDC to this resilient level of success. This institute has given its greatest efforts efficiently through proficient faculty to facilitate medical teaching in the field of Dentistry. I am extremely thankful to our honorable principal madam Prof. Dr. Hosne Ara Begum.

General and Dental Pharmacology department conducts teaching activity in the second year of B.D.S. course. Our department teaches General & Dental Pharmacology and follows the course curriculum, teaching methodology and instruction provided by the University of Dhaka. Our department takes lecture classes, tutorial classes and practical classes as per rules of the University of Dhaka. Our department teaches basic principles of pharmacotherapy where students learn about medicines used for different health issues and diseases. Here students learn about medicine, mechanism of action, indications, contraindications and adverse effects of medicine. Here lesson is given in two division one is General Pharmacology another is Dental Pharmacology. In General Pharmacology students learn about application of medicine regarding general health issues (such as anti-inflammatory medicine, analgesic, antimicrobials, antidiabetic medicine, antihypertensive medicine and so on) and in Dental Pharmacology students specifically learn about medicine used in dental problems (such as Local anaesthetics, Anti-plaque, Anticaries, Sialogogue, Root canal medicaments and so on) as per course content of University of Dhaka.

Our department also takes practical classes as per course curriculum. Students also attend practical classes related to clinical aspects with the collaboration of departments regarding clinical subject where they learn the practical aspects aside the theoretical lessons.

I wish the conference a great success. I am sure the conference is a grand scientific extravaganza.

Samia

Dr. Samia Ahmed Chowdhury
Assistant Professor & Head
Dept. of General & Dental Pharmacology
University Dental College

From the Desk of Head of the Department of Pathology & Microbiology

I am extremely happy and pleased to pen the following few lines by way of a message to the Silver Jubilee Celebration of University Dental College (UDC).

Started in 1995, as a private dental college, UDC has grown by leaps and bounds to occupy one of the top ranking dental colleges in the country.

It has provided quality education and clinical experience to thousands of students. It is a matter of great satisfaction that, the dental surgeons turned out by the institution are providing valuable service to people not only Bangladesh but even outside.

I congratulate UDC on this joyous occasion and convey my best wishes to the Chairperson, office bearers, teaching and non teaching staff and students of this college.

Dr. Nusrat Jahan
Asst. Professor and Head
Dept. of Pathology & Microbiology
University Dental College

From the Desk of Head of the Department of Medicine

It gives us immense pleasure to know that University dental college is gearing up for silver jubilee celebration. Thanks to many who prayed & toiled over the years. Any celebration entails looking back all the wonders Allah has wrought for us and being thankful too. Without the Lord's providence we will not have reached the threshold of 25 years.

The beginning must have been tough and challenging for all of us, but the dedication of those who have served the institution in various capacities has borne fruits. While I congratulate, I also accord my blessing upon the institution & wish to progress according to the will of Allah.

Medicine department plays a vital role in achieving clinical knowledge from years. Now the medicine department of UDC is conducted by a group of experienced teachers.

My heartiest thanks to authority, our students & parents, staff, teachers—both present & past.

Prof. Dr. Abul Hasnat
Professor and Head
Department of General Medicine.
University Dental College

From the Desk of Head of the Department of Surgery

I joined this institute about 18 years ago as Assistant Professor of General Surgery. I was asked to teach anatomy, which I continued for 4 years. When Prof. Kazi Anwerul Haque retired I became Departmental Head of General Surgery and ultimately promoted as Assoc. Professor (C.C). Since then I am taking University Professional examination as internal examiner. About 15 students got honors in our subject and came to merit list under University of Dhaka. I became examiner as external in many dental colleges since last 15 years.

As soon as I joined here in November 2003 I was asked to arrange everything to start with the general hospital. I took only three months to start the hospital.

The first operation was a Gall Stone Surgery under G/A open method. Currently about 100 operations which includes General Surgery, Orthopaedic, Gynae and Obs, Oral & Maxillofacial Surgery, ENT, Urology, Neurosurgery, Laparoscopic and Endoscopic Surgery going on in a month.

This hospital has golden opportunity for poor and lower middle class people of our population with two free beds for extremely poor patient.

Sincerity, honesty, dedication, support from college administration has made us successful. Long live UDCH for the students and for the poor patients.

Dr. S.E. Kabir
Associate Professor & Head
Dept. of General Surgery
University Dental College

From the Desk of Head of the Department of Periodontology & Oral Pathology

The department of periodontology at University Dental College and Hospital, established in 1995, provides avenues for all round development through training, patient care and research. The department has dedicated, qualified and competent faculty members who are constantly making an endeavor to enhance teaching standards with sections having well equipped modern dental chairs and clinical skills training in preventive periodontal procedures has been at the core of this department's objectives.

We are pleased to know that University Dental College is celebrating its 25th anniversary this year. Over the past 25 years, the college has grown exponentially and provided quality and holistic education to the student's from diverse backgrounds.

We hope that with its commitment to excellence the college will achieve newer heights in future. We congratulate the college fraternity on the occasion of silver jubilee celebrations and wish them all success in their future endeavors.

Hosne Ara Begum

Prof. Dr. Hosne Ara Begum
Professor and Head
Dept. of Periodontology & Oral Pathology
University Dental College

From the Desk of Head of the Department of Oral & Maxillofacial Surgery

I am thrilled that University Dental College is celebrating its Silver Jubilee on April 10, 2021 and a souvenir is being brought to commemorate this event.

On this grand occasion, I am pleased to welcome all the graduates and students of University Dental College & Hospital, Dhaka. This premier private dental college of Bangladesh is the ideal place to produce qualified dental graduates. It has been trying relentlessly since its inauguration to create a unique academic atmosphere, and has become successful in this endeavor, by producing the 1st batch of graduates under the University of Dhaka in 2000.

All of us at the Maxillofacial Surgery and Diagnostics Department always emphasize the great value of this immense honor by providing a high-quality educational environment. We also realize this by preparing the college students in all stages of study to be the doctors of tomorrow, committed to both efficiency and high-quality work, thus providing the highest standards of health care in our dear country Bangladesh.

Approaching its 25th Anniversary, UDC will continue to strive for excellence in terms of education and dedicating itself to serving the community. I congratulate the University Dental College on the joyous occasion of its Silver Jubilee and convey my best wishes to the chairman, the directors, the teaching and non-teaching staff & all the alumni and students of this college.

Prof. Dr. Abu Ahammad Shahidul Islam
Professor and Head
Dept. of Oral & Maxillofacial Surgery
University Dental College

From the Desk of Head of the Department of Conservative Dentistry & Dental Radiology

On behalf of the department of Conservative Dentistry and Endodontics, It is my great pleasure to convey my message to the participant that University Dental College is going to celebrate the silver jubilee program and dental summit -2021 in an auspicious moment in the hotel Radisson Blu water garden, Dhaka when the dentistry of Bangladesh is passing through its golden period.

I would like to share my sincere thanks to the implementation committee to make the event more memorable as the same time we are celebrating the centennial birth anniversary of father of the nation Bangabandhu Sheikh Mujibur Rahman. It seems to me that the reunion is going to be impassioned when the directorial, faculty members, alumni students and others will meet each other after a long time and thus this bonding will help them to take any challenge in future. Besides, the conference will enlighten and inspire us in our commitment to enrich our knowledge and strength our skill while challenging conventional thinking about dental patient. The scientific deliberations by the dental surgeons will expand our horizon and explore new innovations in dentistry.

As a faculty member of pretty UDC family, I feel proud to be a part of episode and wish every success of the upcoming event.

Dr. Md. Abul Kalam Azad
Assistant professor and Head
Dept. of Conservative Dentistry and Endodontics
University Dental College

From the Desk of Head of the Department of Prosthodontics

It gives me great happiness to write this message on the occasion of the 25th silver jubilee celebration of University Dental College. During the past 25 years the University Dental College has enlightened the knowledge to national and international students to become a Dentist, providing healthcare seamless services for the nation. I wish all the Doctors, Principal, Directors, Teachers and Staff of this college for prosperity and service to humanity and to society.

I pray to the Almighty Allah that this college grows and becomes the leading Dental college in Bangladesh. Happy jubilee!!!

Prof. Dr. Saiful Islam
Professor and Head
Dept. of Prosthodontics
University Dental College.

From the Desk of Head of the Department of Orthodontics

I deem it my privilege to welcome you all to University Dental College, which has been consistently ranked as one of the best among the private dental college in Bangladesh. I am honored to serve as the Head of the department of Orthodontics of this prestigious institution.

With a mission to excel globally in dental education and oral health care, University Dental College has committed to explore new frontiers in Bangladesh. The college is located at the heart of Dhaka City with excellent infrastructure such as new age classrooms, phantom head lab, health sciences library, well organized hostels. To compliment this, the dental clinics are equipped with ultramodern dental chairs, cutting edge diagnostic gadgets and top-class oral health care facilities. The college prides itself in having highly competent oral health professionals who are also erudite and dedicated teachers. The support staff are efficient and friendly.

The department of Orthodontics is committed to provide the very best to all our students and patients. Our department is having full time faculty with great experience behind them. We are constantly being upgraded to train our future orthodontist in the most skillful way.

The students are being given a brilliant exposure both at a patient level and also at a technological level. Year after year, our students are achieving best ranks in the University and this highlights the tremendous effort being put by our faculty in training and nurturing the young minds.

In this great occasion of Silver Jubilee of University Dental College, I offer my sincere congratulations to UDC family and want to thanks the authority to celebrate this important professional achievement.

Zakir Hossain

Prof. Dr. Md. Zakir Hossain
Professor and Head
Department of Orthodontics
University Dental College

From the Desk of Head of the Department of Pediatric Dentistry

It gives me immense pleasure to know that University Dental College is going to celebrate "UDC Dental Summit 2021 & Silver Jubilee Celebration" on Saturday, 10th April 2021 at Radisson Blu Water Garden, Dhaka.

Dentistry in Bangladesh is really in need of advancements and technological improvements for which UDC have been playing a crucial role for the last 25 years, among the government & private dental colleges in Bangladesh. It is twenty-five years now since inception and development of the institution has been significant and I'm happy to scale new horizons and reach this far. The future will be built on the firm foundations which have been established for the benefit of the students.

I hope that the UDC in near future promote the enthusiastic dental surgeons an opportunity to learn best treatment protocols and standards and serve the country and world. The health care professional will get an opportunity to plant and nourish themselves under the shade of UDC in latest advances in dentistry. The event will hopefully preview the previous success and will cheer the participants.

The event will feature highly respected speakers who will share, discuss, and dissect significant new developments and advancements that will hopefully impact the future of dentistry in Bangladesh through UDC. The planned program will provide a chance to get along with the new and old students and teachers, staffs, a merriment and a joyous unforgettable day for all UDCians.

From the core of my heart, I wish good luck to UDC for upcoming event and may UDC lead the dentistry of Bangladesh a leap forward future.

Dr. Ashik Qureshi
Associate professor and Head
Department of Paediatric Dentistry
University Dental College

From the Desk of Head of the Department of Dental Public Health

I am very satisfied indeed to inform that University Dental College is gearing-up for the Silver Jubilee celebration. It is extremely noteworthy that the institution considers its motto to be "duty to nurture its students as responsible doctor with strong values, who will leverage their individual's achievements to strengthen the fabric of the community, the nation and the world."

I convey my heartiest wishes and appreciation to all and sundry associated with the college as well as the publication of this souvenir for their tireless efforts and support to make this college a successful entity.
